SUMMARY

Aspiring RPA & AI Engineer pursuing MCA with hands-on experience in Python, SQL, Power BI, workflow automation, and AI-driven solutions. Skilled in data preprocessing, machine learning fundamentals, API integration, and business process automation using n8n and Make.com. Familiar with Agentic AI concepts, autonomous workflows, and intelligent automation systems. Passionate about building scalable automation solutions that improve efficiency and support data-driven decision-making.

EDUCATION

Master of Computer Applications (MCA) – Pursuing

Sant Gadge Baba Amravati University, Amravati

Bachelor of Science (B.Sc.), Percentage: 75% (CGPA: 7.5/10)

Graduation Year: 2024

EXPERIENCE

Intern

Tata Consultancy Services (TCS)

- Worked in a professional enterprise environment supporting technology and business operations.
- Assisted in process analysis and workflow understanding to identify automation opportunities.
- Participated in documentation, reporting, and operational improvement initiatives.
- Collaborated with team members to analyze business requirements and improve process efficiency.
- Enhanced analytical thinking, problem-solving, communication, and teamwork skills through real-world project exposure.

PROJECTS

AI-Powered Resume Screening System | Technologies: Python, n8n, NLP, Workflow Automation

- Developed an automated candidate screening workflow to analyze resumes and extract relevant skills.
- Implemented resume ranking logic based on job-specific criteria.
- Automated report generation and candidate evaluation processes.
- Demonstrated integration of AI techniques with workflow automation platforms.

Customer Churn Prediction Analysis | Technologies: Python, Pandas, NumPy, Scikit-Learn

- Performed data preprocessing, feature engineering, and exploratory data analysis.
- Built machine learning models to identify customers at risk of churn.
- Evaluated model performance using standard machine learning metrics.
- Generated actionable business insights to support customer retention strategies.

Automated Business Intelligence Dashboard | Technologies: Power BI, SQL, Excel

- Designed interactive dashboards to monitor KPIs and business performance.
- Developed visual reports for trend analysis and decision support.
- Automated reporting processes to improve operational efficiency.

TECHNICAL SKILLS

Programming: Python

Programming: SQL

AI & Machine Learning: Machine Learning Fundamentals

AI & Machine Learning: Data Preprocessing

AI & Machine Learning: Model Training & Evaluation

AI & Machine Learning: Scikit-Learn

AI & Machine Learning: NumPy

AI & Machine Learning: Pandas

AI & Machine Learning: TensorFlow (Learning)

AI & Machine Learning: PyTorch (Learning)

Automation & RPA: n8n

Automation & RPA: Make.com

Automation & RPA: UiPath (Learning)

Automation & RPA: Workflow Automation

Automation & RPA: API Integration

Automation & RPA: Business Process Automation

Data Analytics & Visualization: Power BI

Data Analytics & Visualization: Microsoft Excel

Data Analytics & Visualization: Data Cleaning

Data Analytics & Visualization: Data Analysis

Data Analytics & Visualization: Dashboard Development

Databases: MySQL

Databases: SQL Server

Tools & Platforms: Git

Tools & Platforms: GitHub

Tools & Platforms: Jupyter Notebook

Tools & Platforms: VS Code

CORE COMPETENCIES

Robotic Process Automation (RPA) Agentic AI Concepts Workflow Automation AI/ML Solution Development
Problem Solving Analytical Thinking Business Process Optimization Team Collaboration Communication Skills
Continuous Learning

CAREER OBJECTIVE

To secure an RPA & AI Internship where I can apply my Python, AI/ML, analytics, and automation skills to develop intelligent business solutions. Eager to contribute to automation projects involving Agentic AI, Machine Learning, UiPath, n8n, and Make.com while gaining hands-on experience in enterprise-scale intelligent automation and AI-driven process optimization.
